

## JavaScript – Tutorial

### 07.

```
<html>
<head>
  <title>Math Operations</title>
</head>
<body>

  <script>
    // Get inputs from prompt boxes
    let num1 = parseFloat(prompt("Enter the first number:"));
    let num2 = parseFloat(prompt("Enter the second number:"));

    // Addition
    let addition = num1 + num2;
    alert("Addition: " + addition);

    // Subtraction
    let subtraction = num1 - num2;
    alert("Subtraction: " + subtraction);

    // Division
    let division = num1 / num2;
    alert("Division: " + division);

    // Multiplication
    let multiplication = num1 * num2;
    alert("Multiplication: " + multiplication);
  </script>

</body>
</html>
```

## 08.

```
<html>
<head>
  <title>Year of Birth from NIC</title>
</head>
<body>
  <script>
    // Get NIC number from prompt box
    let nicNumber = prompt("Enter your NIC number:");

    // Extract year of birth using substring method
    let yearOfBirth = "19" + nicNumber.substring(0, 2);
    alert("Year of Birth: " + yearOfBirth);
  </script>
</body>
</html>
```
